Machines in His Jurisdiction.

The latest stunt in the automobile business arrives from Cleveland, O. where it is reported that autos have fallen away in prices to such an extent that they are favorably compared with bicycles in prices. No particular makes of autos are quoted in the new price list, but the city assessor of that city says that automobiles range all the way from \$50 up to \$1300. Several of the most prominent residents of that city say their machines are very cheap, they having an inside method of securing machines at low figures.

It is nevertheless a fact that owners in the big Onio city value their automobiles very cheaply, particularly when the assessor visits them. John D. Rockefeller, for instance, who has a stable of eight machines, including a splendid ilmosine built to his order, values them at \$1300, while Alexander Winton says he uses a \$300 car. The most valuable machines in the city are those owned by Mayor Tom L. Johnson, according to the tax duplicate. He has three cars, two American touring cars and one of a famous French make, which have a total valuation of \$4700. Samuel Mather, one of the richest men in the city gets along finely with an automobile worth \$50, and a number of other owners in the city have been cutting quite a dash with cars said to be worth from \$80 to \$100 aplege.

Federal authorities have had any trace of Clark, who had been indicted in the United States court for the offense. The robbery occurred six years ago, and Clark and a man named Cole were suspected. The amount stolen was \$150. Clark was finally located through the vigilance of the civil service corps. Inspector E. J. Locke of Burlington, Vt. learned that Clark's parents were receiving letters bearing the Provo postmark and he sent word to the postmaster here to notify the Sheriff the instant that Clark received any mail. This afternoon, late, a letter was delivered by carrier to Clark and almost immediately the Sheriff arrested the fugitive.

As soon as the church property is vacated, which will be some time next fall, the Crane company will begin the erection of a fine modern, freproof building which is to cover the entire site. It will be several stories high and cost approximately \$150,000. During the visit of President Crane a few weeks ago it was decided that the company's present building at No. 141 East Fourth South street was too small to accommodate the growing plumbers' supply business of the firm, and Mr. Crane selected the Baptist church corner as being the most available site for a new building. What disposition is to be made of the company's present three story brick structure on East First South street has not been determined. Since Mr. Crane's departure negotiations for the firm were conducted by William Bowers, the local mace. negotiations for the firm were conducted by William Bowers, the local manager. One of the largest parties of Eastern tourists that has visited Salt Lake this season arrived at the knutsford Tuesday morning and spent the day in the city. The party included prominent citizens from six different Eastern States. The large majority, however, were residents of Chicago. It was designated as a first-class tour under the auspices of the tourist department of the Union Pacific and North Western lines. E. M. Hawley, traveling agent, was in personal charge of the party, which occupied four Pullman cars, a composite library buffet, smoking car and a diner. The train left Chicago. August 3 for the Yellowstone National park, Utah and Colorado.

Up to the time of its departure from here Tuesday evening over the two Grande for Colorado Springs, not an accident or unpleasant incident lind occurred to mar the pleasure of the trip. Those in the party expressed themselves as having spent a delightful day in Salt Lake. In addition to visiting the interesting parts of the city they nearly all took a dip in the briny waters of Salt Lake at Saltair in the afternoon.

In speaking of the trip to the National park, Dr. Carlos Emmons Cummings of Buffalo, N. Y., sald: "Our trip has been one of uninterrupted pleasure since leaving Chicago. The weather in the park was delightful. We drove forty miles in a snowstorm last Saturday, which was an experience we had not counted on it was a genuine snowfall. Often it fell so thick and fast we couldn't see the leader horses. The park is filled with tourists as never before.

"The principal object of my trip was to search for material upon which to lecture next winter. I am secretary and isoturer of the Buffalo Society of Natural Sciences. Our society does cooperative work with the public schools. I am sent every year into different countries by the society to gather material for these lectures. I have been to Europe for this purpose, and last year I traveled through Old Mexico. A description of these countries, their physical condition and their topography, the animals indigeno
